

Learning Styles – A Simplified List

- **Auditory** -- A student with an auditory learning style learns best when information is delivered in auditory formats such as lectures, discussions, oral readings, audio recordings, or podcasts. Auditory learners do well in classroom settings where professor lectures and student discussions are the norm. These students also do well with taped courses and group study situations.
- **Visual** -- A student with a visual learning style learns best when information is presented in visual formats such as books, articles, web pages, images, videos, or diagrams. Visual learners do well with class handouts, power point presentations, movies, and chalkboards. These students take detailed notes, highlight their texts, and use flow charts for study aids.
- **Tactile** -- A student with a tactile learning style learns best when information is conveyed in "hands-on" settings such as trade positions, labs, workshops, or participatory classes. Tactile learners respond well to touching and creating things in areas such as art and science. These students want to hold and manipulate the subject matter, rather than merely viewing an image of it.

List of 16 Career Clusters

- Agriculture, Food, and Natural Resources
- Architecture and Construction
- Arts, Audio/Video Technology, and Communications
- Business Management and Administration
- Education and Training
- Finance
- Government and Public Administration
- Health Science
- Hospitality and Tourism
- Human Services
- Information Technology
- Law, Public Safety, Corrections and Security
- Manufacturing
- Marketing
- Science, Technology, Engineering, and Mathematics
- Transportation, Distribution, and Logistics
